

## CULTURE-SENSITIVE CARE TOWARDS THE END OF LIFE

The hospice and palliative service DaSein e. V., established in 1991, has set out to care for migrants living in Munich, who have serious illnesses or are dying.

## We offer individual advice and care for seriously ill and dying patients and their relatives.

### We...

- prepare individual care plans and provide advice on relieving pain, breathlessness, nausea and anxiety
- cooperate with your physicians and accompany you on your visits to the doctor, if so desired
- organise care as needed
- provide continuous palliative care at home, if needed
- treat symptoms - e.g. pain management
- help you fill in applications and deal with the authorities
- come to your home and have time for conversations, reading to you and going for walks, for example
